

FUSION NANOBOND™ AESTHETIC INSTRUMENTS

Using space-age Nanotechnology the FUSION NANOBOND™ Aesthetic Instrument Line fuses the color particles right to the stainless steel handles of the instruments. This proprietary process creates a semi-translucent, aesthetically pleasing, fully functionally instrument handle. The FUSION NANOBOND™ color coating can be applied to our entire plier line and is available in six vibrant colors. FUSION NANOBOND™ pliers and cutters not only work great but they look great too!

**6 COLORS
